PROGRAM NARRATIVE

Program Data Collected in Accordance with the
Mississippi Performance Budget and Strategic Planning Act of 1994
(To Accompany Form MBR-1-03)

MSU - Water Resources Research Institute

1 - RESEARCH & TECHNOLOGY TFR

AGENCY NAME

PROGRAM NAME

I. Program Description:

Established by the U.S. Congress in 1964, the Mississippi Water Resources Research Institute (MWRRI) is one of 54 institutes (one in each state, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands) that form a network of research efforts coordinated to solve water problems of state, regional, or national significance. In 1983, the Mississippi Legislature formally designated the MWRRI as a state research institute. Federal legislation specifies that the institute consult with leading water officials in the state to develop a coordinated research technology transfer and training program that applies academic expertise to water and related land-use problems. These activities are funded in large part through an annual grant from the U.S. Geological Survey, Department of the Interior. The Institute's state authorization charges it with assisting state agencies in the development of a state water management plan, maintaining a technology transfer program, and serving as a liaison between Mississippi and funding agencies.

II. Program Objective:

- (1) Serve public and private interests in the conservation, development, and use of water resources.
- (2) Provide training opportunities in higher education whereby skilled professionals become available to serve government and private sector alike.
- (3) Assist planning and regulatory bodies at the local, state, regional, and federal levels.
- (4) Communicate research findings to potential users in a form that encourages quick comprehension and direct application to water related problems.

III. Current program activities as supported by the funding in Columns 6-15 (FY 14 Estimated & FY 15 Increase/Decrease for continuations) of MBR-1-03 and designated Budget Unit Decisions columns of MBR-1-03-A:**(D) Inflation:**

A core operations inflation factor of 5.0% is used for MWRRI budgeting.

PROGRAM PERFORMANCE INDICATORS AND MEASURES
 Program Data Collected in Accordance with the Mississippi Performance Budget and Strategic
 Planning Act of 1994

MSU - Water Resources Research Institute
 AGENCY NAME

1 - RESEARCH & TECHNOLOGY TFR
 PROGRAM NAME

PROGRAM OUTPUTS: (This is the measure of the process necessary to carry out the goals and objectives of this program. This is the volume produced, i.e., how many people served, how many documents generated.)

	<u>FY 2013</u> <u>ACTUAL</u>	<u>FY 2014</u> <u>ESTIMATED</u>	<u>FY 2015</u> <u>PROJECTED</u>
1 Number of Projects	30.00	23.00	23.00
2 Faculty Participation	32.00	23.00	23.00
3 Student Training	64.00	50.00	50.00
4 Conference Attendees	111.00	250.00	250.00
5 Consultation with Agencies	169.00	156.00	156.00
6 Technology Publications/Information Transfer	26,195.00	28,000.00	28,000.00

PROGRAM EFFICIENCIES: (This is the measure of the cost, unit cost or productivity associated with a given outcome or output. This measure indicates linkage between services and funding, i.e., cost per investigation, cost per student or number of days to complete investigation.)

	<u>FY 2013</u> <u>ACTUAL</u>	<u>FY 2014</u> <u>ESTIMATED</u>	<u>FY 2015</u> <u>PROJECTED</u>
1 Cost of Proceedings on CD (available online only)	0.01	0.00	0.00
2 Cost of Conference (held in November 2010)	26,562.40	29,000.00	29,000.00
3 Cost of Newsletter (Available online only)	0.01	0.00	0.00

PROGRAM OUTCOMES: (This is the measure of the quality or effectiveness of the services provided by this program. This measure provides an assessment of the actual impact or public benefit of your agency's actions. This is the results produced, i.e., increased customer satisfaction by x% within a 12-month period, reduce the number of traffic fatalities due to drunk drivers within a 12-month period.)

	<u>FY 2013</u> <u>ACTUAL</u>	<u>FY 2014</u> <u>ESTIMATED</u>	<u>FY 2015</u> <u>PROJECTED</u>
1 Small public water systems in millions	1.20	1.20	1.20
2 Economic impact savings in millions	1.00	1.00	1.00

**NARRATIVE
2015 BUDGET REQUEST**

MSU - Water Resources Research Institute

Name of Agency

I. Program Description:

Established by the U.S. Congress in 1964, the Mississippi Water Resources Research Institute (MWRRI) is one of 54 institutes (one in each state, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands) that form a network of research efforts coordinated to solve water problems of state, regional, or national significance. In 1983, the Mississippi Legislature formally designated the MWRRI as a state research institute. Federal legislation specifies that the institute consult with leading water officials in the state to develop a coordinated research technology transfer and training program that applies academic expertise to water and related land-use problems. These activities are funded in large part through an annual grant from the U.S. Geological Survey, Department of the Interior. The Institute's state authorization charges it with assisting state agencies in the development of a state water management plan, maintaining a technology transfer program, and serving as a liaison between Mississippi and funding agencies.

II. Program Objectives:

- (1) Serve public and private interests in the conservation, development, and use of water resources.
- (2) Provide training opportunities in higher education whereby skilled professionals become available to serve government and private sector alike.
- (3) Assist planning and regulatory bodies at the local, state, regional, and federal levels.
- (4) Communicate research findings to potential users in a form that encourages quick comprehension and direct application to water related problems.

III. Research Impacts

Conjunctive Water Management Strategies in the Delta

The future of the Mississippi Delta's economic and environmental viability depends on abundant, accessible water of sufficient quality. Water needs in this region are broad, ranging from personal consumption to irrigation to fisheries and aquatic habitat to wetlands and wildlife to waste water assimilation and beyond. The Delta, however, is currently experiencing significant water resources challenges - continuing declines in the water level of the Mississippi River Valley Alluvial Aquifer (MRVA) and regional expansion of its cone of depression, continuing overbalances of groundwater withdrawals versus aquifer recharge, increasing water withdrawal permit applications, continued lowering of dry-season stream flows, and more incidents of drought-induced dry stream beds. These, of course, complicate the well-documented water quality challenges experienced in the region, such as excessive levels of nutrients and sediment. The MWRRI is providing technical assistance to the Delta Sustainable Water Resources Initiative, led by the Mississippi Department of Environmental Quality, as it attempts to address this pressing need. The MWRRI is also providing financial assistance in support of MSU Extension and Research staff working on innovative irrigation approaches using software tools such as PHAUCET.

Alternative Water Supplies for Economic Development

The Toyota Motor Manufacturing Mississippi site (TMMMS) in Blue Spring, MS is permitted to use up to 2,000,000 gallons of water per day. The Mississippi Power Kemper County Energy Facility may use up to 10,000,000 gallons per day. Neither of these facilities has access to traditional ground water sources. The Toyota Plant uses water from the Tennessee Tombigbee Waterway. The Kemper plant uses Meridian's treated wastewater. The MWRRI is working with both of these industrial giants to identify other sustainable water supplies. The MWRRI is leading a research effort at TMMMS to design and install native plant material for both pollinator habitat and reduced irrigation needs. The TMMMS has almost 30 acres of roof, which could capture up to 1,000,000 gallons of rainwater from a one inch rain storm. Water harvesting may prove to be a partial solution for both these sites.

Urban and Suburban Water Quality Strategies

The environmental health of coastal ecosystems is under threat from population growth, resulting in point and non-point sources of nutrients and sediment. The MWRRI, in conjunction with the Mississippi Department of

NARRATIVE
2015 BUDGET REQUEST

MSU - Water Resources Research Institute

Name of Agency

Environmental Quality and the Natural Resources Conservation Service, is providing technical design solutions to citizens of Diamondhead, MS that could have significant impacts on water quality impairments in Rotten Bayou. A model storm water ordinance is also being created as part of this work effort. The goal is to develop a process that can be replicated in other urban centers across the state of Mississippi.

REACH Program

The Research and Education to Advance Conservation and Habitat (REACH) Program is an innovative, grass-roots collaboration that will integrate research and outreach on specific Mississippi farms to demonstrate the benefits of conservation on agricultural lands. The products developed by this program will be used to further conservation delivery and adoption in agriculture. Led by Professor Robbie Kroger and supported by the MWRRI, REACH plans a multi-year, multi-farm program that will generate research-based results, create opportunities for field days and demonstration sites, provide justification for federal investments in conservation and support the health of Mississippi's water resources, both inland and downstream to the Gulf of Mexico. This is the second year of supporting the REACH program.

EPA Center of Excellence for Watershed Management in Mississippi

In April, 2013 the U.S. Environmental Protection Agency (EPA), the Mississippi Department of Environmental Quality (MDEQ), and Mississippi State University (MSU) signed a memorandum of understanding (MOU) creating a Center of Excellence for Watershed Management in Mississippi. The Center will be administrated through the Mississippi Water Resources Research Institute (MWRRI), but will be a collaborative work effort between MWRRI, MDEQ, and EPA. The primary purpose of the Center is to utilize the diverse talent and expertise of colleges and universities provide hands on practical products and services to help communities identify watershed-based problems and develop and implement locally-sustainable solutions.
